1. Claims 4, 5, 14, 18, and 23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on December 22, 2005.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 6, 8-13, 15-17, 19-22, 24-27 are rejected under 35 U.S.C. 102(b) as being anticipated by DE 29,505,682.

DE '682 teaches a four wheel drive vehicle having a power source 1 that drives a first differential 16, then power take-off gearing 24-26 to a prop shaft 27. The prop shaft drives a two mode drive unit 30 which drives a rear differential 32.

4. Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lanzer shows a four wheel drive vehicle with a central drive unit having planetary gearing.

Palazzolo shows a four wheel drive vehicle with a central drive unit having two modes.

Art Unit: 3611

Brown and Hamada each show a central drive unit with multiple speeds.

Forsyth and Sommer each show a central drive unit.

Haka and Lovatt each show a two speed central drive unit.
